2. Open config.lua file
3. Configure your config.lua to your preferences (Configure notify line in bottom of config.lua you need use our notify system or you need change notify line to your system)
4. Put rtx_waterpark to the server.cfg

Install instructions (QBCore):

1. Put rtx_waterpark folder to your resources
2. Open config.lua file
3. Configure your config.lua to your preferences (Configure notify line in bottom of config.lua you need use our notify system or you need change notify line to your system)
4. Put rtx_waterpark to the server.cfg
5. If you want to use waterpass system, add new items to qb-core/shared/items.lua - items name: waterpass, waterpassunlimited

Example items line for items.lua:

```
['waterpass'] = {[ 'name' ] = 'waterpass', [ 'label' ] = 'Water Pass', [ 'weight' ] = 1000, [ 'type' ] = 'item', [ 'image' ] = 'waterpass.png', [ 'unique' ] = false, [ 'useable' ] = true, [ 'shouldClose' ] = true, [ 'combinable' ] = nil, [ 'description' ] = 'Water Pass'},  
['waterpassunlimited'] = {[ 'name' ] = 'waterpassunlimited', [ 'label' ] = 'Water Pass Unlimited', [ 'weight' ] = 1000, [ 'type' ] = 'item', [ 'image' ] = 'waterpassunlimited.png', [ 'unique' ] = false, [ 'useable' ] = false, [ 'shouldClose' ] = true, [ 'combinable' ] = nil, [ 'description' ] = 'Water Pass Unlimited'},
```

Install instructions (ESX):

1. Put rtx_waterpark folder to your resources
2. Open config.lua file
3. Configure your config.lua to your preferences (Configure notify line in bottom of config.lua you need use our notify system or you need change notify line to your system)
4. Put rtx_waterpark to the server.cfg
5. If you want to use waterpass system, upload sql sql_ESX.sql file to your mysql database.
